

West Virginia State Treasurer's Office  
John D. Perdue, Treasurer

Debt Capacity Report  
2009

# Table of Contents

Introduction .....	1
Goodbye 2008.....	2
Debt Capacity	
Purpose I – Determine the amount of net tax supported debt outstanding .....	5
Purpose II – Calculate key ratios that are commonly used to examine debt .....	16
Purpose III – Make recommendations which will attempt to keep the state within an average to low range of nationally recognized debt limits.....	22
Summary of Recommendations .....	28

## Tables contained in the report

1 – Net Tax Supported Debt, June 30, 2008.....	5
2 – Net Tax Supported Debt, Fiscal Years 2003-2019 .....	8-9
3 – Net Tax Supported Debt Service, Fiscal Years 2003-2019 .....	10-11
4 – Historical/Projected Debt Service Burden, State Road Fund.....	12
5 – Net Tax Supported Debt, Various Statistics, June 30, 2008.....	15
6 – Net Tax Supported Debt as a Percentage of Personal Income, Similarly Rated States .....	18
7 – Net Tax Supported Debt Per Capita, Similarly Rated States .....	20
8 – Moody’s “2007 State Debt Medians”, Various Statistics, March 2008 .....	22
9 – Debt Capacity Report, Past Ratio Recommendations & Levels .....	23
10 – Debt Capacity Report, Current Ratio Recommendations & Levels.....	23
11 – Burden Levels of Net Tax Supported Debt Service as a Percentage of the General Revenue Fund .....	24

## Charts contained in the report

1 – Net Tax Supported Debt, June 30, 2008.....	6
2 – Net Tax Supported Debt Service as a Percentage of the General Revenue Fund, Fiscal Years 2003-2019.....	16
3 – Net Tax Supported Debt Service as a Percentage of Revenues, Fiscal Years 2003-2019 .....	17
4 – Net Tax Supported Debt as a Percentage of Personal Income, Fiscal Years 2003-2019 .....	19
5 – Net Tax Supported Debt Per Capita, Fiscal Years 2003-2019 .....	20
6 – Recommended Cap of Net Tax Supported Debt Service as a Percentage of the General Revenue Fund, Fiscal Years 2003-2019 .....	24
7 – Recommended Cap of Net Tax Supported Debt Service as a Percentage of the Revenues, Fiscal Years 2003-2019.....	25
8 – Recommended Cap of Net Tax Supported Debt as a Percentage of Personal Income, Fiscal Years 2003-2019 .....	26
9 – Recommended Cap of Net Tax Supported Debt Per Capita, Fiscal Years 2003-2019 .....	27

# Introduction

The Treasurer must submit an annual Debt Capacity Report to the Governor and the Legislature. According to West Virginia Code §12-6B-4, the report should consider:

The amount of net tax supported debt that, during the next fiscal year and annually for the following ten fiscal years, which will be outstanding, and has been authorized but not yet issued.

Projected debt service requirements during the next fiscal year and annually for the following ten fiscal years based upon existing outstanding debt, previously authorized but unissued debt, and projected bond authorizations.

Any information available from the budget section of the Department of Revenue in connection with anticipated capital expenditures projected for the next five fiscal years.

The criteria that recognized bond rating agencies use to judge the quality of state bonds.

Any other factor that the Division finds as relevant to the ability of the state to meet its projected debt service requirements for the next fiscal year, the ability of the state to meet its projected debt service requirement for the next five fiscal years, and any other factor affecting the marketability of the state's bonds.

The effect of authorizations of new tax-supported debt on each of the above considerations.

This report is designed to be a tool for the Legislature in making important financial decisions concerning the State's long-term debt position and to assist in prioritizing capital spending decisions. It is no secret that the entire world has faced and is facing difficult economic times; therefore, it is important that any available debt capacity be utilized in the most prudent manner. Several states have debt capacity models and reports which have already stated that they have no capacity to issue additional debt. For example, the State of Florida recently reported that according to their financial models and debt capacity criteria they have no additional capacity for the next three fiscal years (based upon current revenue projections and existing borrowing plans). As shown in this report, the State of West Virginia does have limited available capacity, but should exercise prudence in all financial decisions as we face these difficult economic times. The Treasurer's Office would like to thank the various state agencies that provided information in the preparation of this report such as the Department of Revenue and the Division of Finance of the Department of Administration.

# Goodbye 2008

There was a financial storm that hit the world in 2008. This storm had been brewing for several years and many believe that the subprime mortgage crisis in 2006/2007 was the first clap of thunder which signaled trouble. During 2008, it was not uncommon to read headlines about bank bailouts, frozen credit markets, bankruptcies, unemployment, inflation, and four dollar gas prices.

Some of the major headline events that occurred in the financial markets during 2008 included the following:

February:	Northern Rock is nationalized by the United Kingdom
March:	Bear Stearns is acquired by JP Morgan with support from the Federal Reserve
July:	The "Housing and Economic Recovery Act" is passed
September:	Fannie Mae and Freddie Mac are placed into receivership Merrill Lynch sold to Bank of America Lehman Brothers files for Chapter 11 Bankruptcy Federal Reserve lends \$85 billion to American International Group (AIG)
October:	The House and Senate pass and President Bush signs the "Troubled Assets Relief Program" (TARP) Iceland Prime Minister Geir Haarde was reported as reassuring the citizens of Iceland that at least they could fish for food
November:	Federal government announces aid package to Citigroup
December:	The National Bureau of Economic Research officially declares that the United States has been in a recession since December 2007.

Of course, there were many other headlines, but according to several speakers at the 2008 National Association of State Treasurer's Annual Conference, the most shocking headline was the Chapter 11 bankruptcy of Lehman Brothers.

Just as every market in the world found trouble in 2008, the municipal bond market was not isolated from the fallout of the financial storm. The total volume of long-term bond sales in the municipal market dropped more than nine percent in comparison to 2007. State government issuance was down more than 10%, while counties, cities, districts and local authorities were down more than 50%, according to figures taken from Thomson Reuters. The top issuer for 2008 was, once again, the State of California which issued more than \$8.1 billion of municipal debt.

The State of West Virginia also saw a decline in the amount of municipal debt issuance during 2008. West Virginia issued approximately \$1.3 billion of state level municipal bonds during calendar year 2008 which is a 33% decrease from the \$1.9 billion issued during calendar year 2007. According to records kept by the Treasurer’s Office, the top five West Virginia issuers of state level municipal bonds during calendar year 2008 were (in order) the Hospital Finance Authority; the Economic Development Authority; the School Building Authority; the Parkway, Economic Development and Tourism Authority and the Housing Development Fund.

Along with issuance being down in 2008, the net tax supported debt of the state, which is perhaps the most important measure of debt, also decreased during the year. The following is a historical perspective of the State’s net tax supported debt:

Fiscal Year	Net Tax Supported Debt
1998	\$878 million
1999	\$1.25 billion
2000	\$1.34 billion
2001	\$1.39 billion
2002	\$1.49 billion
2003	\$1.49 billion
2004	\$1.62 billion
2005	\$1.75 billion
2006	\$1.68 billion
2007	\$1.60 billion
2008	\$1.52 billion

This \$80 million decrease is approximately the same decrease that West Virginia saw between 2006 and 2007. This is due, in large part, to the fact that West Virginia has no outstanding authorization for General Obligation (GO) debt at the present time and no additional tax supported debt has been issued.

**What’s ahead?**

If you ask 10 different economists, “What’s ahead for 2009?” you will receive at least 10 (if not more) opinions. However, the overall sentiment seems to be summed up in a statement that President-elect Barack Obama made in early December. He said, “The economy is going to get worse before it gets better.” According to a report released by Moody’s Investors Service, this recession may result in more rating downgrades for local governments than any other recession in the last 40 years because it will be deeper and longer-lasting (Bond Buyer, 12/31/2008). At the time of this publication,

many states are wrestling with budgetary shortfalls and are faced with tough decisions on government spending vs. government services. For example, the State of Texas is expecting 10% less revenue for the next biennium while the State of Louisiana is cutting \$341 million from its **current year** budget.

Although the picture may seem bleak, the State of West Virginia is not faring as badly as some states. At the time of the publication of this report, there is no anticipation of a current year budget cut and the predicted drop in the state's General Revenue Fund from 2008 to 2009 is expected to be approximately 1%. West Virginia is in (relatively) good shape to weather this storm but its lawmakers and leaders must remain vigilant. The goal of this report is to examine key debt ratios and provide information as to where West Virginia ranks in relation to other similarly rated states. This comparison is simply one tool to help West Virginia's leaders determine how much (if any) debt should or can be incurred within the year.

# Debt Capacity

The legislative purpose of this report is stated clearly in West Virginia Code §12-6B-1, which is as follows:

- Determine the amount of net tax supported debt outstanding;
- Calculate key ratios that are commonly used to examine debt; and
- Make recommendations which will attempt to keep the state within an average to low range of nationally recognized debt limits.

**Determine the amount of net tax supported debt outstanding**

The calculation of net tax supported debt includes General Obligation Bonds, Revenue Bonds of the School Building Authority which rely on an appropriation from the General Revenue Fund for debt service, Lottery Revenue Bonds and lease obligations of various state agencies.

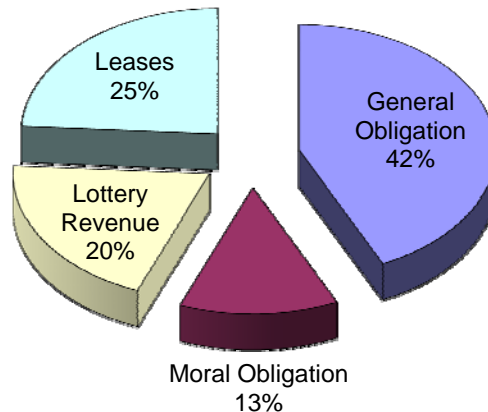

The net tax supported debt of the state at June 30, 2008 is outlined in the following table:

**Table 1**  
**West Virginia Net Tax Supported Debt Outstanding**  
**June 30, 2008**  
 (net of escrow & debt service reserve funds)

Type of Debt		Principal Outstanding June 30, 2008 <small>(rounded to the nearest thousand)</small>	Percentage of debt outstanding
General Obligation Bonds	State Road Bonds	\$ 401,190,000	42%
	Infrastructure Bonds	243,176,000	
Moral Obligation Bonds	School Building Authority	192,654,000	13%
Lottery Revenue Bonds	Economic Development Authority	195,135,000	20%
	School Building Authority	84,860,000	
	State Building Commission	22,865,000	
Lease Obligations *		387,493,000	25%
Net Tax Supported Debt		\$ 1,527,373,000	

\* - Taken from the June 30, 2008 Debt Position Report.

**Chart 1**  
**West Virginia Net Tax Supported Debt Outstanding**  
**by Type of Debt**  
**June 30, 2008**

Calculations of the net tax supported debt and debt service of the State of West Virginia for fiscal years 2003 through 2019 are contained in Tables 2 and 3 (pages 8-11). Fiscal years 2003 through 2007 are included to show the historical perspective of the actual debt issued and the debt service requirements for these obligations. The current and next ten fiscal years, 2009 through 2019, are included to show expected debt levels as existing obligations mature.

The state had planned to issue an additional \$75 million in Special Obligation Highway Notes (GARVEE bonds) in late 2008 but this issue has been delayed. GARVEE bonds are to be repaid from pledged revenues from the Federal Highway Administration (FHWA). Some rating agencies include GARVEE bonds as part of the calculation of net tax supported debt and others do not. For purposes of this report, GARVEE bonds have been **excluded** in the projected debt calculations included in Tables 2 and 3 (pages 8-11); however, we continue to monitor these obligations to insure that they do not have a direct impact on the net tax supported debt of the state.

Several agencies had revenue bonds outstanding at June 30, 2008 such as the West Virginia Higher Education Policy Commission, various state colleges and universities, and the West Virginia Regional Jail and Correctional Facilities Authority. These bonds are self-supporting from revenues of the projects they financed; therefore, they are **excluded** from the calculation of net tax supported debt. The bonds of the West Virginia Tobacco Settlement Finance Authority have also been **excluded** since the bonds are paid directly from tobacco settlement funds and not from funds generated by the state.

Although certain bonds of the West Virginia Water Development Authority, the West Virginia Solid Waste Management Authority, the West Virginia Solid Waste Landfill Closure Assistance Program, and the West Virginia Housing Development Fund are considered moral obligations of the state, they are currently self-supporting and are **excluded** from the calculation of net tax supported debt.

As of the publication of this report, the West Virginia State Treasurer's Office has not received any notification concerning debt to be issued which would directly impact the net tax supported debt of the state.

Revenue information included in Tables 2 & 3 was compiled and provided by the West Virginia Department of Revenue and is included in Appendix B.

## Net Tax Supported Debt Components

### **General Obligation Bonds**

The General Obligation (GO) debt outstanding at June 30, 2008 was \$644.3 million. GO Bonds pledge the full faith and credit of the state and are authorized only by a constitutional amendment approved by 2/3rds of both houses of the Legislature and a majority vote of the public. GO Bonds constitute 42% of the state's net tax supported debt.

### Safe Road Amendment of 1996

This amendment authorized bonds to be issued in an amount not to exceed \$550 million. As of June 30, 2008, the entire authorized amount had been issued and the net principal outstanding was \$401.2 million. The bonds will be completely retired on June 1, 2025.

Table 4 shows the debt service burden on the Road Fund from 2003 through Fiscal Year 2008 and also projects the future debt service burden on the fund through Fiscal Year 2019. According to these projections, the debt service burden peaked at 9.18% during fiscal year 2003.

**Table 4**  
**Historical/Projected Debt Service Burden**  
**State Road Fund**

Fiscal Year	Debt Service	Road Fund Revenue	Debt Service as % of Road Fund
2003	49,995,941	544,729,000	9.18%
2004	49,998,470	570,742,000	8.76%
2005	49,996,023	578,050,000	8.65%
2006	49,997,598	580,904,000	8.61%
2007	49,996,888	611,085,000	8.18%
2008	49,995,733	661,961,000	7.55%
2009	49,998,580	638,115,000	7.84%
2010	49,996,764	637,737,000	7.84%
2011	49,996,264	642,967,000	7.78%
2012	49,997,983	644,480,000	7.76%
2013	38,619,853	643,192,000	6.00%
2014	36,978,446	611,406,000	6.05%
2015	36,983,727	615,000,000	6.01%
2016	36,983,064	615,000,000	6.01%
2017	23,516,375	615,000,000	3.82%
2018	23,516,375	615,000,000	3.82%
2019	23,518,125	615,000,000	3.82%

#### Infrastructure Improvement Amendment of 1994

This amendment authorized bonds in an amount not to exceed \$300 million for water supply and sewage treatment systems and economic development sites. The bonds are secured by a dedication of the first \$24 million in severance tax collections. The principal outstanding at June 30, 2008 was \$243.2 million. All of the General Obligation Infrastructure bonds issued will be retired on November 1, 2026.

The Infrastructure Council also has revenue bonding authority. Revenue issues of this kind do not carry the same rating of a General Obligation issue since the state's taxing power is not pledged toward repayment of the bonds. The proceeds of these bonds were used to provide financial assistance to local governmental entities to finance all or part of the cost of constructing water, wastewater and/or economic development projects. As these bonds are self-supporting, they are not included in the calculation of net tax supported debt.

#### ***Authorized but Unissued General Obligation Bonds***

It is a common practice among those examining the state's credit to look at debt that is authorized but has not been issued.

#### Vietnam Veterans Bonus Amendment of 1973, Veterans Bonus Amendment of 1992 and the Veterans Bonus Amendment of 2004

These amendments authorized the sale of bonds of not more than \$40 million, \$4 million and \$8 million, respectively, for the purpose of paying a bonus to the veterans serving in foreign conflicts. General Revenue Funds were used to pay all of these bonuses and no bonds were issued.

#### Qualified Veterans Housing Bonds Amendment (1984)

This amendment authorized the sale of bonds to provide financing for owner-occupied residences for persons determined by the Legislature to be qualified veterans. The amount of the bonds that may be issued is limited to bonds in which the annual principal and interest do not exceed a total of \$35 million in any fiscal year.

### ***Moral Obligation Bonds***

Various revenue bonds issued by State of West Virginia entities have a moral commitment of the State attached to them. Moral obligation bonds of the state constitute approximately 33% of the total net tax supported debt. Based on the definitions in the West Virginia Code and the Rules for the Reporting of Debt Capacity (see Appendix A), the debt issues include the School Building Authority Capital Improvement Revenue Bonds secured by appropriations of General Revenue funds and the Lottery Revenue Bonds issued by the Economic Development Authority, the School Building Authority and the State Building Commission.

#### School Building Authority Capital Improvement Revenue Bonds

The School Building Authority Capital Improvement Revenue Bonds net principal outstanding at June 30, 2008 was \$192.6 million. No “new money” bonds may be issued by the Authority utilizing General Revenue appropriations for repayment.

#### Lottery Revenue Bonds

The State’s Lottery Revenue Bonds outstanding as of June 30, 2008 total \$302.9 million (net). This total includes one issue of the Economic Development Authority, one issue of the School Building Authority and one issue of the State Building Commission.

Subsequent to June 30, 2008, the School Building Authority issued \$102.1 million of revenue bonds which are secured by a second priority transfer from the State Excess Lottery Revenue Fund. Other Lottery Revenue Bonds of the School Building Authority are secured by a first lien on the net proceeds of the State Lottery Fund while the bonds issued by the State Building Commission have a second in priority lien on the Lottery Fund.

The bonds issued by the Economic Development Authority are secured by a second priority pledge from the Excess Lottery Revenue Fund and, under certain circumstances, from a portion of the moneys on deposit in the State Lottery Fund.

### ***Leases***

As of June 30, 2008, there was \$387.4 million of leases outstanding. Approximately \$29.1 million of new leases were entered into during Fiscal Year 2008. The largest issue was a \$12.5 million dollar lease for Phase Two of the Energy Efficiency Project for WVU (main campus), WVU Parkersburg and WVU – Institute of Technology in Montgomery, West Virginia. The total amount of leases outstanding in this report (\$387.4 million) will differ slightly from the figure reported in the state’s Comprehensive Annual Financial Report (CAFR). This is due to several factors including materiality levels and the fact that this report includes state colleges and universities when reporting the amount of leases outstanding.

***Deductions for Debt Service Reserve Accounts***

A debt service reserve fund can be set up initially out of bond proceeds, can be built up over time or can be funded through a credit facility, such as a surety bond. Reserve funds are tapped only if funds are insufficient to meet the debt service payments and when retiring the debt. These reserve funds are typically set at an amount equal to six months to one year's debt service. The various reserve funds are outlined in the following table, along with the revenue source, the principal outstanding at June 30, 2008, and the remaining authorization.

**Table 5  
Net Tax Supported Debt – Various Statistics  
at June 30, 2008**

Type of Obligation	Issue	Payable From	Principal Outstanding as of 6/30/08 (thousands)	Reserve Accounts as of 6/30/08 (thousands)	Remaining Authorization as of 6/30/08 (thousands)
General Obligation Bonds	Safe Roads of 1996	Road Fund	\$401,190	NA	\$0

	State Building Commission	Lottery Fund	\$25,465	\$2,600	\$0
Leases	Various	Various	\$387,493	NA	NA

### **Calculate key ratios that are commonly used to examine debt**

Key ratios establish benchmarks that the municipal bond industry and others use to provide a measurement of a state's outstanding debt and the servicing (principal and interest payments) of that debt. Ratios are useful tools since they provide quantifiable measurements which are used when analyzing a state's fiscal position. Ratios can also provide insight into economic trends and a state's reliance on debt financing. The debt ratios used in this report include:

Net Tax Supported Debt Service as a Percentage of the General Revenue Fund;

Net Tax Supported Debt Service as a Percentage of Revenues;

Net Tax Supported Debt as a Percentage of Personal Income;

Net Tax Supported Debt Per Capita; and

Net Tax Supported Debt as a Percentage of Assessed Value.

### **Net Tax Supported Debt Service as a Percentage of the General Revenue Fund**

This ratio is not required to be examined; however, it is a traditional measurement which provides important information on the debt service burden of the state's General Revenue Fund. At June 30, 2008, the State's General Revenue Fund had a 4.74% potential debt service burden (see Table 3, pages 10-11). Projections for the General Revenue Fund of the state were provided by the West Virginia Department of Revenue and are provided in Appendix B.

**Chart 2**  
**Net Tax Supported Debt Service as a Percentage of the General Revenue Fund**  
**Fiscal Years 2003-2019**

### Net Tax Supported Debt Service as a Percentage of Revenues

The definition of revenue includes:

1. Total funds deposited in the general revenue fund;
2. The entire related revenue stream for any net tax supported debt which is funded from a source other than the state's General Revenue Fund; plus
3. An amount equal to any deductions from the gross General Revenue Fund for debt service of tax supported debt before the revenue is added to the General Fund.

At June 30, 2008, the state had a net tax supported debt service burden, as a percentage of revenues of 3.64% (see Table 3, pages 10-11).

**Chart 3**  
**Net Tax Supported Debt Service as a Percentage of Revenues**  
**Fiscal Years 2003-2019**

### Net Tax Supported Debt as a Percentage of Personal Income

The income figures in this year's report were compiled and provided by the West Virginia Department of Revenue and are included in Table 2, pages 8-9.

The ratio of debt outstanding as a percentage of personal income is not a determining factor on its own; however, this ratio is required by statute to be examined for the purposes of this report. This ratio is a good indicator of the potential resources to repay debt. Since there is a taxing pledge placed on all General Obligation Bonds, this ratio indicates the ability of the citizens to pay such taxes in the event of a revenue shortfall.

Table 6 lists West Virginia and those states that share a Moody's rating of Aa3 as of December 31, 2007. West Virginia, according to Moody's, had a net tax supported debt, as a percentage of personal income, of 3.9% as of December 31, 2007. According to our calculation, West Virginia had a net tax supported debt, as a percentage of personal income, of 2.76% as of June 30, 2008. This does not match the figure calculated by Moody's Investor Services due to the timing of the report and the information that was available at the time of publication.

**Table 6**  
**Net Tax Supported Debt as a Percentage of Personal Income**  
**Similarly Rated States**

State	Moody's Rating	NTSD as a % of Personal Income
Oklahoma	Aa3	1.5%
Maine	Aa3	1.9%
Arizona	Aa3	2.0%
Michigan	Aa3	2.2%
West Virginia	Aa3	3.9%
Wisconsin	Aa3	4.1%
Rhode Island	Aa3	4.7%
Mississippi	Aa3	4.8%
Illinois	Aa3	5.2%
New York	Aa3	6.3%
Connecticut	Aa3	7.3%
New Jersey	Aa3	7.5%

*Source: "Moody's Investors Services, 2008 State Debt Medians," March 2008*

The following chart examines the net tax supported debt as a percentage of personal income for fiscal years 2003 through 2019 based on the data contained in Table 2, pages 8-9:

**Chart 4**  
**Net Tax Supported Debt as a Percentage of Personal Income**  
**Fiscal Years 2003-2019**

#### Net Tax Supported Debt per Capita

According to the United State's Census Bureau, the State of West Virginia experienced another year of population growth. The most recent report estimates that there were 1,814,468 people residing in West Virginia on July 1, 2008. This is an increase of more than 4,600 people in comparison to July 1, 2007. If West Virginia can maintain a positive trend in population during the current recession, it could be a good indicator for the state's future economic success.

This particular ratio of debt per capita shows the debt service burden on the total population of the state. The debt per capita peaked at \$959 in fiscal year 2005. The national average debt per capita has risen from approximately \$300 in 1988 to \$1,158 in 2008.

The following chart examines the net tax supported debt per capita for fiscal years 2003 through 2019 based on the data contained in Table 2, pages 8-9:

**Chart 5  
Net Tax Supported Debt per Capita  
Fiscal Years 2003-2019**

Table 7 lists West Virginia and those states that share a similar rating of Aa3 from Moody's as of December 31, 2008.

**Table 7  
Net Tax Supported Debt per Capita  
Similarly Rated States**

State	Moody's Rating	NTSD per capita
Oklahoma	Aa3	\$493
Maine	Aa3	\$618
Arizona	Aa3	\$630
Michigan	Aa3	\$748
West Virginia	Aa3	\$1,101
Mississippi	Aa3	\$1,283
Wisconsin	Aa3	\$1,407
Rhode Island	Aa3	\$1,766
Illinois	Aa3	\$1,985
New York	Aa3	\$2,762
New Jersey	Aa3	\$3,478
Connecticut	Aa3	\$3,698

Source: "Moody's Investors Services, 2008 State Debt Medians," March 2008

According to our calculations, West Virginia had a net tax supported debt per capita of \$842 as of June 30, 2008 (see Table 2, pages 8-9 for the specific calculation). This figure does not match with the calculation presented in the Moody's "State Debt Medians" report due to the timing of the report and the information that was available at the time of publication.

Net Tax Supported Debt as a Percentage of the Assessed Value of Taxable Property

It is difficult to find guidance on this ratio since it is not typically used or discussed; however, it is a ratio analysis required by West Virginia law. As of June 30, 2008, the net tax supported debt as a percentage of assessed value is 2.05%.

**Make recommendations which will attempt to keep the state within an average to low range of nationally recognized debt limits**

The final step in this analysis is making recommendations based on keeping the state within a certain range of debt ratios. Most ratios are easily accessible; therefore, making comparisons to other states and making recommendations of keeping the state in the average to low range is quite easy. There are also certain industry practices that have been recognized as prudent fiscal management. For example, many states have constitutional or statutory caps on how much of their General Fund can be obligated toward debt repayment.

The following table was derived from Moody's "2008 State Debt Medians." It shows the average (or "median"), the high and the low for two of the ratios examined in this report. This comparison is made to West Virginia ratios in order to carry out the legislative intent of this report, which is to make recommendations with the aim of keeping the state in the "average to low range of nationally recognized debt limits." The national average debt per capita for 2007 is \$1,158 and the average debt as a percentage of personal income is currently 3.2%.

**Table 8 – Moody's "2008 State Debt Medians"  
March 2008**

Ratio	Average	High	Low	West Virginia Ranking#
NTSD per capita	\$1,158	\$4,529 Massachusetts	\$22 Nebraska	\$1,101 #19
NTSD as a % of Personal Income	3.2%	9.9% Hawaii	0.1% Nebraska	3.9% #17
Total NTSD	NA	\$61.5 billion California	\$39 million Nebraska	\$1.9 billion #31

*As reported by Moody's in March 2008. These figures do not necessarily agree with the amounts stated in this report by the West Virginia State Treasurer's Office, generally due to timing and the inclusion of certain obligations. For our specific calculations, see Tables 2 and 3, pages 8 through 11.*

The following tables outline the recommendations made in previous debt capacity reports and the current recommendations.

**Table 9  
Debt Capacity Report - Past Ratio Recommendations & Levels**

<i>Ratio</i>	<i>2004</i>		<i>2005</i>		<i>2006</i>		<i>2007</i>	
	Recommended	Actual	Recommended	Actual	Recommended	Actual	Recommended	Actual
NTSD service as a % of the General Revenue Fund	5.00%	4.98%	5.00%	5.32%	5.00%	4.85%	5.50%	4.88%

NTSD as a % of Assessed Value	2.00%	2.05%

*NTSD stands for Net Tax Supported Debt*

Net Tax Supported Debt Service as a Percentage of the General Revenue Fund

Perhaps the most important ratio measurement is the debt service burden on the General Revenue Fund. This ratio shows the potential strain on the General Revenue Fund if, for some reason, all other funds are insufficient to pay debt service. Table 11 (below) was developed through research of several publications such as “Developing Formal Debt Policies” a publication from GFOA, “Benchmark GO Ratios” from Standard & Poor’s Credit Week, and various debt management reports from around the country.

**Table 11 – Burden Levels of Net Tax Supported Debt Service as a Percentage of the General Revenue Fund**

<b>0 to 5%</b>	<b>6 to 7%</b>	<b>8 to 10%</b>
LOW	MEDIUM	HIGH

As detailed in Table 10, page 23, the state had a 4.74% debt burden as a percentage of the General Revenue Fund at June 30, 2008. This is currently below the recommended cap of 5.0% as demonstrated in the following chart:

**Chart 6  
Recommended Cap of Net Tax Supported Debt Service as a Percentage of the General Revenue Fund  
Fiscal Years 2003-2019**

### Net Tax Supported Debt Service as a Percentage of Revenues

The recommended cap on this particular ratio is currently at 4%. This ratio is lower because it includes all revenues, e.g. the Road Fund, the Lottery Fund and the dedicated severance tax collections used to pay debt service on the Infrastructure General Obligation Bonds. At June 30, 2008, the state had a net tax supported debt service burden as a percentage of revenues of 3.64%.

The following chart examines the net tax supported debt service requirements as a percentage of revenues for fiscal years 2003 through 2019, in relation to our recommended cap of 4%, and based on the data contained in Table 3, pages 10-11:

**Chart 7**  
**Recommended Cap of Net Tax Supported Debt Service**  
**as a Percentage of Revenues**  
**Fiscal Years 2003-2019**

Net Tax Supported Debt as a Percentage of Personal Income

The recommended cap for this particular ratio is 3.0% because the average net tax-supported debt as a percentage of personal income is 3.2% and this report calls for recommendations on the average-to-low range of the ratio. The following chart examines the net tax supported debt outstanding as a percentage of personal income for fiscal years 2003 through 2019, in relation to our recommended cap of 3.0% and based on data contained in Table 2, pages 8-9:

**Chart 8**  
**Recommended Cap of Net Tax Supported Debt**  
**as a Percentage of Personal Income**  
**Fiscal Years 2003-2019**

### Net Tax Supported Debt Per Capita

The national average of this particular ratio has grown over the past 20 years from approximately \$300 in 1988 to \$1,158 in 2008. Based upon the current national average, the recommendation for this particular cap remains at \$1,000. The following chart examines the net tax supported debt per capita for fiscal years 2003 through 2019, in relation to our recommended cap of \$1,000 and based on data contained in Table 2, pages 8-9:

**Chart 9**  
**Recommended Cap of Net Tax Supported Debt per Capita**  
**Fiscal Years 2003-2019**

### Net Tax Supported Debt as a Percentage of the Assessed Value of Taxable Property

As of June 30, 2008, the net tax supported debt as a percentage of assessed value is 2.05%. The recommended cap for this recommendation is 2.0% and has no basis on any particular research since none has been located at the time of this publication.

# Summary of Recommendations

The first Debt Capacity Report was released in 1998. During the 11 years that ensued, the report has never released the following statement, until now:

“West Virginia is below the recommended cap on four out of five of the ratios examined in this report.”

Being below the debt capacity cap is an excellent place to be, especially during the current economic climate. It is indicative of the dedication and tough decisions that state lawmakers and leaders have faced as they have placed West Virginia on a fiscally prudent course.

Although having additional debt capacity may seem to be a good thing, it is advisable to maintain prudence during these times. According to a recent report in “The Bond Buyer,” officials with the National Governors Association and the National Association of State Budget Officers say that states are facing at least four years of slowed revenue growth, reduced spending to levels not seen for nearly 30 years, and forced budget cuts of as much as \$200 billion during fiscal years 2009 and 2010 combined.

This Debt Capacity report is required to make recommendations based on certain criteria which have been discussed throughout the report. Therefore, to comply with the requirements of the report the following recommendations are made:

Based on the mid-to-low range of nationally recognized debt limits, we recommend the following caps:

Net Tax Supported Debt Service as a percentage  
of the General Revenue Fund: 5.0%

Net Tax Supported Debt Service as a percentage  
of Revenues: 4.0%

Net Tax Supported Debt as a percentage  
of Personal Income: 3.0%

Net Tax Supported Debt  
Per Capita: \$1,000

Net Tax Supported Debt as a percentage  
of Assessed Value: 2.0%

We also recommend that if additional debt is considered then it should be carefully scrutinized and structured to keep West Virginia at or below the recommended levels of debt contained in this report.

## **Appendix A**

**West Virginia State Code §12-6B  
&  
Legislative Rule, Title 112 Series 9**

## **West Virginia State Code §12-6B DEBT CAPACITY ADVISORY DIVISION.**

### **§12-6B-1. Purpose.**

The purpose of this article is to provide a mechanism by which necessary information may be provided to the governor and the Legislature so that they may prudently manage the state's financial resources by attempting to keep the state within an average to low range of nationally recognized debt limits. The ratio measurements which may be taken into consideration in attempting to meet these limits include, but are not limited to, outstanding net tax supported debt per capita, net tax supported debt as a percentage of personal income, net tax supported debt as a percentage of assessed valuation, and any other criteria that recognized bond rating agencies use to judge the quality of issues of state bonds.

### **§12-6B-2. Debt capacity advisory division created.**

There is hereby created within the offices of the state treasurer a debt capacity advisory division.

### **§12-6B-3. Definitions.**

For the purpose of this article:

- (a) "Debt" means bonds, notes, certificates of participation, certificate transactions, capital leases and all other forms of securities and indebtedness.
- (b) "Debt impact statement" means a signed statement from the treasurer which shall include such information and be in such form, as determined by the division, for the Legislature or the governor to make an informed decision concerning the issuance of debt by the state or its spending units.
- (c) "Division" means the debt capacity advisory division established in this article.
- (d) "Net tax supported debt as a percentage of assessed valuation" means the net tax supported debt, as determined by the division, divided by the most recently available estimated assessed valuation of all taxable property in the state by the West Virginia department of tax and revenue.
- (e) "Net tax supported debt as a percentage of personal income" means the net tax supported debt, as determined by the division, divided by the most recently available personal income figures for the state by the West Virginia bureau of employment programs.
- (f) "Net tax supported debt per capita" means the state's net tax supported debt, as determined by the division, divided by the most recently available population estimate for the state by the United States department of commerce.

(g) "Spending unit" means any of the state's agencies, boards, commissions, committees, authorities, or other of its entities with the power to issue debt and secure such debt, but not including local political subdivisions of the state.

(h) "Tax supported debt" means: (1) All obligations of the state or any spending unit to which the state's full faith and credit is pledged to pay directly or by guarantee (provided that any such guaranteed obligations shall be included only to the extent any such obligations are in default); and (2) all obligations of the state or any agency or authority thereof extending beyond one year with respect to the lease, occupancy or acquisition of property which are incurred in connection with debt financing transactions, including, but not limited to, certificates of participation, and which are payable from taxes, fees, permits, licenses and fines imposed or approved by the Legislature.

Tax supported obligations do not include: (1) Any obligations of the West Virginia housing development fund, the economic development authority, the hospital finance authority, the West Virginia parkway authority, the West Virginia public energy authority, the West Virginia solid waste management board, and the West Virginia water development authority; (2) revenue anticipation notes or bonds of the state; or (3) any obligations to the extent that the debt service with respect thereto is reasonably expected to be offset, as determined by the division, by lease payments, user fees, federal grants or other payments from some source other than the general fund. Such payments shall be used expressly for the purpose of paying debt service.

(i) "Treasurer" means the treasurer of the state of West Virginia.

#### **§12-6B-4. Powers and duties.**

The division shall perform the following functions and duties:

(a) Promulgate rules pursuant to article three, chapter twenty-nine-a of this code, for the management and conduct of its affairs;

(b) Annually review the size and condition of the state's tax-supported debt and submit to the governor and to the Legislature, on or before the fifteenth day of January of each year, an estimate of the maximum amount of new tax-supported debt that prudently may be authorized for the next fiscal year, together with a report explaining the basis for the estimate. The estimate shall be advisory and in no way restrict the governor or the Legislature. In preparing its annual review and estimate, the division shall, at a minimum, consider:

(1) The amount of net tax supported debt that, during the next fiscal year and annually for the following ten fiscal years: (A) Will be outstanding; and (B) has been authorized but not yet issued;

(2) Projected debt service requirements during the next fiscal year and annually for the following ten fiscal years based upon: (A) Existing outstanding debt; (B) previously authorized but unissued debt; and (C) projected bond authorizations;

(3) Any information available from the budget section of the department of administration in connection with anticipated capital expenditures projected for the next five fiscal years;

(4) The criteria that recognized bond rating agencies use to judge the quality of state bonds;

(5) Any other factor that the division finds as relevant to: (A) The ability of the state to meet its projected debt service requirements for the next fiscal year; (B) the ability of the state to meet its projected debt service requirement for the next five fiscal years; and (C) any other factor affecting the marketability of such bond; and

(6) The effect of authorizations of new tax-supported debt on each of the considerations of this subsection.

(c) Conduct ongoing review of the amount and condition of bonds, notes and other security obligations of the state's spending units: (1) Not secured by the full faith and credit of the state or for which the Legislature is not obligated to replenish reserve funds or make necessary debt service payments; (2) for which the state has a contingent or limited liability or for which the Legislature is permitted to replenish reserve funds or make necessary debt service payments if deficiencies occur. When appropriate, the division shall recommend limits on such additional obligations to the governor and to the Legislature. Such recommendation is advisory and shall in no way restrict the governor, the Legislature or the spending unit.

(d) The treasurer may review all proposed offerings of debt, as defined in this article, submitted to the division of debt management, as provided in section six, article six-a of this chapter. The division may also request any additional information which may be needed to issue an advisory opinion to the governor, the speaker of the House of Delegates and the president of the Senate as to the impact of the proposed offering on the state's net tax-supported debt outstanding and any other criteria which the treasurer feels may be relevant to the marketability of said offering and its impact on the state's credit rating. Such advisory opinion shall in no way restrict the governor, the Legislature or the spending unit.

(e) Do all things necessary or convenient to effectuate the intent of this article and to carry out its powers and functions.

**Legislative Rule, Title 112 Series 9**  
**RULES FOR THE REPORTING OF DEBT CAPACITY**

**§112-9-1. General.**

1.1. Scope. — This rule implements the provisions of W. Va. Code §12-6B-1 et seq., which provides that the State Treasurer's Division of Debt Capacity is responsible for the gathering and reporting of information concerning the State's ability to meet its debt obligations, and to incur new debt, and for conducting an ongoing review of the amount and condition of bonds, notes, and other security obligations of the State's spending units.

1.2. Authority. — W. Va. Code §12-6B-4.

1.3. Filing Date. — May 6, 1998

1.4. Effective Date. — May 7, 1998

1.5. General Purpose. — The purpose of this rule is to carry out the legislative intent, as stated in W. Va. Code §12-6B-1, to provide necessary information to the Governor and the Legislature so that they may prudently manage the state's financial resources by attempting to keep the State within an average to low range of nationally recognized debt limits.

**§112-9-2. Definitions.**

For the purpose of this rule, unless a different meaning is clearly required by the context:

2.1. "Capital Lease" means a lease in which the lessee assumes substantially all the risks and benefits associated with the asset and which meets one or more of the following criteria:

2.1.1. The lease transfers ownership of the leased asset at the end of the lease term;

2.1.2. The lease terms and conditions contain a bargain purchase option which allows the Lessee to buy the leased asset for substantially less than the estimated value of the leased item;

2.1.3. The term of the lease is seventy-five percent (75%) or more of the estimated economic life of the leased asset. The estimated economic life is the estimated useful life of the asset for the purpose for which it was intended, regardless of the term of the lease. For example, if a copier with an estimated economic life of ten (10) years were leased for eight (8) years, it would meet this criterion; or

2.1.4. The present value of the future minimum lease payments at the beginning of the lease equals or exceeds ninety percent (90%) of the fair value of the asset.

2.2. "Debt" means bonds, notes, Certificates of Participation, certificate transactions, Capital Leases, lease purchases, mortgages and all other forms of securities or paper evidencing amounts owed and payable on demand or specified dates, as determined by the Treasurer .

2.3. "Debt Impact Statement" means a signed statement from the Treasurer which contains the information specified in Subsection 3.2 of this Rule and may accompany, at the request of a member of the Legislature, a bill introduced to the West Virginia Legislature which authorizes the issuance of debt.

2.4. "Division" means the division of debt capacity.

2.5. "General Obligation Bonds" means debt in the form of bonds supported by a constitutional obligation of the State to make debt payments if no other source of funds is available. The creation of general obligation debt requires a constitutional amendment approved by two-thirds of both houses of the Legislature and a majority vote by the public.

2.6. "Installment Purchase" means a lease agreement in excess of one year providing for the application of rental payments to the purchase price of equipment or facilities. A spending unit's obligation under the lease purchase agreement is made expressly subject to appropriations by the Legislature, thus creating a "moral obligation" on the part of the Legislature to appropriate necessary rent when the lease payments are due and payable.

2.7. "Mortgage" means a debt instrument for financing the purchase of real property by which the borrower gives the lender a lien on the property as security for the repayment of the loan.

2.8 "Net tax supported debt" means: (1) general obligation bonds of the state net of any refundings, defeasances, reserve requirements or sinking funds; (2) moral obligations of the state net of any refundings, defeasances, reserve requirements or sinking funds; (3) capital leases, lease purchases, mortgages, installment purchases, certificates of participation and any other debt financing transaction extending beyond one year, net of any refundings, defeasances, reserve requirements or sinking funds, which are payable through an annual appropriation of the Legislature. "Net tax supported debt" includes lottery bonds, but does not include revenue bonds or any other debt that is self-supporting from enterprise revenues: Provided, That the obligation shall not be excluded to the extent the obligations are in default;

2.9. "Other Debt" includes installment purchases as defined in subsection 2.6 of this section; mortgages as defined in subsection 2.7 of this section; and short-term debt as defined in subsection 2.10 of this section.

2.10. "Short-Term Debt" means notes which generally have a term of five years or less, including but not limited to tax anticipation notes, revenue anticipation notes, grant anticipation notes and certificates of participation.

2.11. "Moral Obligation Bond" is a bond secured by a pledge of revenue and a moral commitment of the state of West Virginia to appropriate funds to make up any deficiency of the revenues needed to pay the debt service;

2.12. "Spending unit" means any of the State's agencies, boards, commissions, committees, authorities, entities or other units of State Government with the power to issue debt and secure debt, with the exclusion of local political subdivisions of the State.

2.13. "State" means the State of West Virginia.

2.14. "Treasurer" means the West Virginia State Treasurer.

2.15. "Revenue bonds" are bonds secured by a specified revenue stream, often with a lien imposed on the revenues. The revenue stream may be a tax or assessment or the revenues of the project financed.

2.16. "Lottery bonds" are bonds secured by lottery revenues;

2.17. "Revenues" means: (1) total funds deposited in the general revenue; plus (2) the entire related revenue stream for any net tax supported debt which is funded from a source other than the state's general revenue fund; plus (3) an amount equal to any deductions from the gross general revenue for debt service of tax supported debt before the revenue is added to the general revenue fund.

An example of revenue as defined in this subdivision 2.17.2 of this subsection is the State Road Fund revenues. The total revenues of the State Road Fund (exclusive of Federal funds) are used to repay the Road Bonds and are therefore included in revenue.

An example of revenue as defined in subdivision 2.17.3 of this subsection is the amount of severance tax dedicated for repayment of the Infrastructure Bonds. Those dedicated severance taxes are therefore included in revenue.

### **§112-9-3. Debt capacity and debt impact reporting.**

3.1. Annual debt capacity report - The division with the cooperation and support of the Department of Administration, the Department of Tax and Revenue and the Bureau of Employment Programs shall issue an annual report, on or before October 1st of each year. The annual debt capacity report reviews the size and condition of the state's net tax supported debt and estimates the maximum amount of net tax supported debt which should be authorized based upon ratios and guidelines established by the major bond

rating agencies. The ratios and guidelines shall be consistently applied based upon the state's definitions.

3.2. Debt impact statement - The Treasurer shall prepare a debt impact statement, only at the request of any member of the Legislature of West Virginia, which shall at a minimum include the following:

3.2.1. Current net tax supported debt;

3.2.2. Current net tax supported debt as a percentage of personal income;

3.2.3. Current net tax supported debt per capita;

3.2.4. A list of assumptions derived from the House or Senate bill for which the debt impact statement is being prepared;

3.2.5. The recommendation of the Treasurer;

3.2.6. The total debt service as a percentage of revenue;

3.2.7. Current ratios and guidelines as established and/or reported by the major rating agencies; and

3.2.8. A comparison of West Virginia's ratio to other states with similar bond ratings.

3.3. Additional Information - The division may, pursuant to W. Va. Code §12-6B-4(d), require any additional information from any spending unit to carry out the provisions as outlined in W. Va. Code §12-6B-1 et seq.

3.4. Additional Reports and Advisory Opinions - The Treasurer may, as he or she considers necessary, issue advisory letters, notices and/or opinions on new debt issuance, the condition of the State's outstanding debt and any other factor which the Treasurer determines may directly or indirectly effect the State's credit rating.
